

ENGINEERED LIFTING SOLUTIONS

HOISTING FOR EXTREME APPLICATIONS

**ARTICULATED LOW HEADROOM
TROLLEY HOIST COMBINATION**

1,000 KG – 10,000 KG LIFTING CAPACITY

**ATEX
Explosion Protected**

Leaflet No. KITO-83885:01

ARTICULATED LOW HEADROOM TROLLEY HOIST COMBINATION

1,000 KG – 10,000 KG LIFTING CAPACITY

ATEX
Explosion Protected

Designed and manufactured according to:

- ▶ EC machinery directive 2006/42/EC
- ▶ ATEX Directive 2014/34/EU
- ▶ EN13157
- ▶ Manufactured in the Netherlands

Standard features:

- ▶ Designed for extremely small curved beams
- ▶ Suitable for extremely narrow spaces in and low headroom applications
- ▶ Equipment classification Gas II 2G EX h IIB T3 Gb (zone 1)
- ▶ Equipment classification Dust II 2D EX h IIB T200°C Db (zone 21)
- ▶ Low pulling force on the hand chain
- ▶ Chain hoist executed with double safety pawl, safe and sure brakes
- ▶ Chain hoist with overload protection by slipping clutch
- ▶ Surface treatment 2 layer paint system and power coating, colour Munsell 6YR6/14
- ▶ Nickel plated load chain, grade V (G 100) in acc. with standard EN818-7
- ▶ Hand chain electric galvanized
- ▶ Trolley wheels with life time lubricated bearings
- ▶ Wheel break support and anti-tilt device integrated
- ▶ Rubber buffers mounted on trolley
- ▶ Ambient temperature -20°C / +40°C

Optional:

- ▶ Available in equipment class Gas II 2G EX h IIC T3 Gb (zone 1)
- ▶ Available in equipment class Dust II 2D EX h IIIC T135°C Db (zone 21)
- ▶ Temperature class T4 / T135°C will be observed separately for each project
- ▶ Suitable for ambient temperature -40°C +40°C
- ▶ Special surface protection acc. to ISO 12944
- ▶ 3.1 load test certificate
- ▶ Canvas chain bag, steel or stainless steel container
- ▶ Solid bronze wheels
- ▶ Parking device for parking in unloaded condition
- ▶ Stainless steel 316 load chain and hand chain
- ▶ Stainless steel nameplate with tag number

Remark:

** The articulated low headroom trolley hoist units are executed with a fixed suspension set within the range of the beam width as mentioned in the tables. The minimum radius is mentioned in the table is for indication and need to be verified once the monorail beam is specified.

Explosion Protected:

Equipment is executed with non-sparking materials for fast mechanical contact parts for hand chain movements and internal fast moving hoist parts, extended with unique and reliable bronze coated load hooks.

Capacity kg	Article number	Chassis	Fixed beam width in range mm	Min. Beam radius** mm	No. of falls	Chain size mm	max. pulling force hoist kg	max. pulling force trolley kg	Weight 3 meters lift kg	Head- room G	Dimensions
